Operation & Maintenance

Failed light source should be replaced promptly or the circuit switched off to avoid possible damage to control gear.

Important - Safety

Before carrying out any servicing on these luminaires, ensure that the mains supply is fully isolated.

Disconnect the luminaire before insulation testing of the installation.

ⓘ Wood treatment is necessary to prevent weathering and/or cracking.

Use a premium woodcare product to stain and protect.

Always follow the manufacturer's instructions and reapply as directed.

Note: Gemma lighting will not be held responsible for cracks or fading if bollard has been installed and not treated.

The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.
