The indirectly radiating floor stands of the RUSTY SLOT series convince by their exceptional rust look. This is achieved by a special chemical treatment of the FeCSi steel used. This makes the luminaire a unique piece and an absolutely special feature wherever they are installed. It is suitable for use outdoors thanks to its IP44 protection class. As an option, an earth spike and a connection box for safe electrical connection are available within the square bollard. The connection of the two versions available is made to the 230V mains supply. This luminaire is suitable for lamps of energy classes: A - A+
