

## E4235- Microspot Outdoor Wall Spotlight - Black - 12v MR11

### Description

E4235 Elipta Microspot outdoor wall spotlight is a miniature adjustable 12v wall spotlight typically used for spotlighting small focal points or downlighting from arbours or pergolas. The flush lens sheds water and leaf litter and is easy to clean. A low energy option is a warm white LED lamp providing almost the same light output as the standard 20w halogen lamp. Microspot Wall is complemented by Microspot Spike for matching miniature lighting in roof gardens and other small spaces.
