

E6532P - Compact Bollard Light - Black – 240v

Description

E6532P is a contemporary outdoor bollard light that uses a 7 watt E27 LED Candle lamp - recommended for driveway and path lighting, especially if timer-operated for long periods. This minimises energy consumption and lamp replacement. This garden bollard light is supplied as standard with a finned spike for installation in soil and gravel.

Electrical	240v E27 retro-fit LED
Colour/ Finish	Black powder-coated aluminium with a Frosted polycarbonate diffuser
Exterior Dimensions	Body 270mm tall x 60mm wide; comes with a 200mm spike.

Installation guidelines

Pre-wired with 2m rubber cable. 240v versions can be connected into a mains junction box or a T9969 underground joint kit. Ensure soil is loose enough for spiking into the ground: forcing the spike into hard soil may damage the fitting.

Using a single RCD for large numbers of 240v fittings is not recommended due to the risk of nuisance tripping. We advise the use of separate RCD protection for each circuit and a maximum of 12 fittings per RCD. Where a garden lighting installation of more than 12 spike mount or recessed lights per circuit is proposed, we suggest the installation of 12v units with transformers, which results in a significantly higher fault tolerance and reliability in the total installation.

**2 YEAR
WARRANTY**

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials.
Corrosion due to exposure to salt or chlorine.
Damage due to incorrect installation practices.
Responsibility for 3rd party cost; indirect or consequential loss
