

E8112 - Smoothie Eyelid Light - Stainless Steel - 240v

Description

E8112 is a stylish 240v recessed light for illuminating steps or patios which can take a choice of GU10 halogen, long-life energy-saving compact fluorescent and 3w or 5w led lamp. **Order lamps separately.** Smoothie is fitted with a frosted lens as standard to diffuse the lighting and the eyelid hood hides the lamp from above when walking past. The light is located by an "O" ring on the body into a sleeve tube so that no external screw fixings are visible. Remember that recessed steplights are in effect recessed spotlights - avoid using them facing viewpoints.

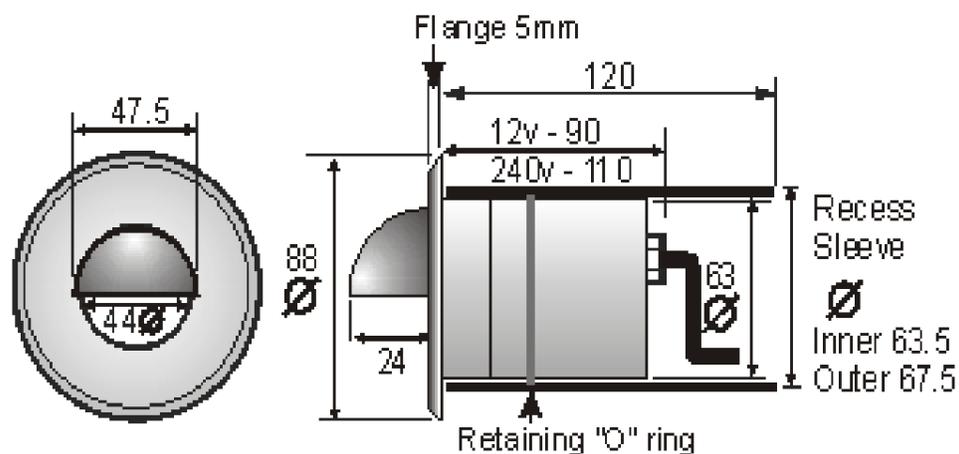

Electrical data	240v GU10, dimmable with suitable LED
Colour/ Finish	Stainless Steel top with an aluminium body
Exterior Dimensions	110mm long Body x 63mm circumference with a plastic sleeve of 120mm long and a circumference of 67.5mm. Stainless steel top of 88mm circumference and a 24mm protruding eyelid.

Installation guidelines

The plastic sleeve is built into the wall during construction or retrofitted into a hole cut with a coring bit: the light pushes into the tube, where it is held firmly in place by an "O" ring, leaving a front plate with no visible fixing screws. Recess depth 120mm. Smoothies should not be installed in ground subject to waterlogging.

Using a single RCD for large numbers of 240v fittings is not recommended due to the risk of nuisance tripping. We advise the use of separate RCD protection for each circuit and a maximum of 12 fittings per RCD. Where a garden lighting installation of more than 12 spike mount or recessed lights per circuit is proposed, we suggest the installation of 12v units with transformers, which results in a significantly higher fault tolerance and reliability in the total installation.

2 YEAR WARRANTY

Internal wiring & lampholder

Exclusions: Damage due to incorrect lamp fitting or lamps above specification. Responsibility for 3rd party cost; indirect or consequential loss
